

Nicole Green
ISIA Board Chair
VP of Operations and Communication, Central Biomedica Inc.

Nicole Green has been involved in the animal serum industry for over 20 years and is currently Vice President of Operations and Communication at Central Biomedica, Inc. She has served in many different roles including quality, production, and management. During her tenure she has been responsible for regulatory affairs, quality, business development, and overall company culture. Nicole has been actively involved in the ISIA as leader of the Traceability Team and is now board chair.

Nicole believes in providing safe materials to end users who are producing and researching life-saving products for humans and animals.

Nicole holds a BA in Biology from MidAmerica Nazarene University. She enjoys reading, listening to podcasts, and learning something new every day. She resides in Kansas City, Missouri with her husband and two children.
