

Volodymyr (Vlad) Tiutiun

Head of Operations, Moregate Biotech

Originally from Ukraine, Vlad graduated from the National University of Life and Environmental Sciences of Ukraine (formerly National Agricultural University) with a degree in veterinary medicine with honors.

After moving to Australia in 2012 he worked as a beef farm manager prior to joining Moregate Biotech in 2017 and has worked through all levels of the business, from Production Manager to General Manager.

He enjoys the daily challenges, loves to contribute and support the company's growth, and is fascinated by the vastness of animal serum applications on a global scale. Inspired by James Dunster and Elizabeth Meixner, Vlad's role has grown to manage the operations of Moregate under new owners after the company was acquired by ANZCO foods in 2022.

Vlad lives with his wife and two children in Brisbane, Australia.
